

LASER CATARACT

*What is it? What are the benefits to my patients?
How should I answer questions from my patients and help them?*

CME course & LIVE phaco-free all-laser surgery
(4 hours, COPE Course ID: 33579-PO, TOA sponsored)
Sunday, March 18th at 8:30 am – 1pm
Breakfast and lunch will be provided

Dear colleague,

LASER CATARACT is here!

The Tennessean recently published a front-page article reporting TN's FIRST LASER cataract surgery using the only fully FDA-approved laser in the U.S. for cataract surgery, Alcon's LenSx laser. **Wang Vision currently is the only center in TN that offers laser cataract surgery.**

- 15 years ago, refractive surgery went from blade (RK), to laser (LASIK).
- Today, a similar blade-to-laser revolution is taking place, and this time in cataract surgery.
- And, its impact will be *greater than LASIK*, since there are 5 times more pts having CSx!

On 12/1/11, Dr. Ming Wang, MD, PhD, performed:

- TN's first laser cataract surgery using the only fully FDA-approved laser in the U.S.
- The world's first 3D laser cataract surgery using TrueVision microsurgical technology.
- The first *phaco-free all-laser* cataract surgery (U.S. patent pending).

On Sunday, March 18, 2012, 8:30am-1pm, we will offer a CME course (4 hrs), a tour of the LenSx laser and *live observation of phaco-free all-laser cataract surgeries!* If you are interested, please contact Ms. Stacey Carden (stacey@wangvisioninstitute.com, 615-480-9653).

You are also invited to a private tour & live phaco-free surgery

You are also invited to join Dr. Wang, for a private tour of the LenSx laser and observation of phaco-free all-laser cataract surgeries on any Tuesday or Thursday. Please contact Stacey.

Dr. Ming Wang, Harvard & MIT (MD, *magna cum laude*); PhD (laser physics)
Drs. Helen Boerman, OD FAAO, Amy Waymire, OD, Michael George, MD, Annie Yeh, OD
